

ABHIYANK KUMAR

+91 9627679373 | abhiyankkhatana@gmail.com | [LinkedIn](#) | [GitHub](#) | Greater Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Final-year Computer Science student (2022–2026) at GL Bajaj Institute of Technology and Management with strong foundations in Data Structures & Algorithms, DBMS, OS, and OOPs. Experienced in building responsive full-stack web applications using React and Redux. Hands-on practitioner of Generative AI technologies including LangChain, LangGraph, Hugging Face, and RAG architecture. Seeking to leverage applied AI and web development skills in a challenging software engineering role.

EDUCATION

B.Tech — Computer Science & Engineering

2022 – 2026

GL Bajaj Institute of Technology and Management, Greater Noida, India
CGPA: 7

Sr. Secondary Education (Class XII)

2020 – 2021

Lord Krishna Public School, Nanauta (S.R.E), Uttar Pradesh
Percentage: 65

PROJECTS

AI-Powered Medical Chatbot (RAG Architecture) | [Project](#)

Mar 2026 – Mar 2026 |

- Developed an AI-powered medical chatbot using
- Retrieval-Augmented Generation (RAG) to answer domain-specific queries from medical documents with context-aware accuracy.
- Integrated Pinecone vector database with open-source LLMs via Hugging Face and LangChain for semantic search and response generation.
- Deployed a Flask-based user interface enabling real-time query processing; chatbot achieved ~85% relevance accuracy on test queries.
- Tech Stack: Python, LangChain, Hugging Face, Pinecone, RAG, Flask, LLM

Myntra Clone — E-Commerce Frontend | [Project](#)

Jan 2025 – Apr 2025 |

- Built a fully responsive e-commerce frontend replicating Myntra's UI with product listings, filters, product detail pages, and cart functionality.
- Implemented state management using Redux Toolkit; app handled 200+ product cards with smooth rendering and sub-2s load time.
- Designed reusable React components following modular architecture, improving code maintainability and scalability.
- Tech Stack: HTML, CSS, JavaScript, React.js, Redux, Redux Toolkit

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Frontend Development: HTML, CSS, React.js, Redux, Redux Toolkit

Backend & APIs: Node.js, REST APIs, FastAPI, Flask

AI / Machine Learning: NumPy, Pandas, Scikit-learn, Machine Learning, Generative AI, RAG, LangChain, LangGraph, Hugging Face

Databases: SQL, Pinecone (Vector DB)

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Core CS Concepts: Data Structures & Algorithms, DBMS, Operating Systems, OOPs

CERTIFICATIONS

IBM Artificial Intelligence Fundamentals — IBM (via Credly) | 2025

- Covered foundational AI concepts including machine learning, neural networks, and real-world AI applications.

Credential: [Verify on Credly](#)

ACHIEVEMENTS & ACTIVITIES

Hackaccino Hackathon — Participant: Participated in Hackaccino Hackathon; collaborated in a team to design and prototype a tech solution under competitive time constraints.
